## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 1 and 6-15 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 01 August 2007.
2. This application contains claims 1 and 6-15, drawn to an invention nonelected with traverse in the reply filed on 01 August 2007. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Drawings***

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because:
  - a. Each panel needs to be individually labeled, e.g., Fig. 2A, Fig. 2B, Fig. 2C, Fig. 2D, Fig. 3A, and Fig. 3B,
2. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 2-5 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 6,153,379 (Caskey et al.).
6. Caskey et al., column 4, penultimate paragraph, teach that arrays of oligonucleotide primes can be synthesized and that the oligonucleotide primers can range from 'about 7 to about 30 nucleotides' in length.
7. Caskey et al., column 4, last paragraph, bridging to column 5, first paragraph, teach, "The array includes oligonucleotide primers comprising all possible N-mers." Such a showing is deemed to meet a limitation of each of claims 2-5.

***Conclusion***

8. Objections and/or rejections which appeared in the prior Office action and which have not been repeated hereinabove have been withdrawn.
9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
10. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
